

What went well?

What should we keep doing?  
What should we celebrate?  
Where did we make progress?

What went poorly?

Where did we have problems?  
What was frustrating to us or others?  
What held us back?

What Went Well is a retrospective technique that serves a crucial role in the agile methodology and has become widely used in the agile community. It is one of the best opportunities for both remote and in-office teams to analyze any potential improvements by asking two (seemingly simple) questions: what went well and what didn't go so well?

This means try to explain the situation, your task, the action you took and the result of your actions. For example, you might share a time you felt frustrated about slow internet because your team was facing an important deadline.

The WISE retrospective is a four-step process that focuses on what went well, areas for improvement, suggestions for the next sprint, and ...

But don't let your celebrations end there. Look for every reason imaginable to celebrate: the first day of spring, last day of autumn, the first snowfall, the shortest day of the year, a child's progress report, the 100th day of the school year, birthdays, anniversaries, significant milestones, important events.
